ADDITIONAL INFORMATION

Delivery Requirements	Item Is Collection Only.
-----------------------	--------------------------

OVERVIEW

5-conductor surface track for three circuits. Consisting of an extruded aluminium profile and two PVC supporter profiles, each with two embedded 2.5 mm² cross section copper conductors, for three independent switchable circuits, earthing through the aluminium profile. Easily cuttable in the field with a standard saw, no cutting back or bending back of conductors necessary. The track has pre-punched slotted holes at 333mm centres for ease of fitment
