OVERVIEW

With an impressive diameter of just over 1m, Mantra's Nepal range can use minimal materials to create impact. In a completely new design for their ventilation lighting, Nepal uses a stylish twist propeller concept, taking a different route to the fans usual concealment and instead making this section a central feature. In order to enhance and not detract from this aesthetic, the LEDs are diffused within a dome shape ring forming the fan's illuminating border. Available in four colour options this fixture is controllable via the remote supplied with the item, Bluetooth APP or Alexa and Google voice control, bringing a functional design into today's modern home and workspace.
