Cayman

Average Life (hrs)	25000hrs
Warranty (yrs)	3yrs

OVERVIEW

The Cayman range is a seemingly unassuming collection of surface spot lights until illuminated. As well as the LED arm set forward at a downward angle, emitting a 3W 3000K light, there is also a band of diffused LED lighting between the backplate and fixing plate offering a total 6W with the same colour temperature. Each LED function can be controlled with its own individual switch located on the front of the backplate. Both the plate and the LED arm are formed with round shapes. Available in four colour finishes; white, satin nickel, sand black and antique brass it is an ideal wall/reading lamp with a unique design aspect.
