### OVERVIEW

Niseko is a unique, modern collection of pendants and flush fittings by Mantra Fusion. The combination of the circular ring and central illumination, create a homely halo effect giving elevation to a seemingly simplistic design. Their high powered integral LEDs are diffused within the inside of the metal band framework and the pendants are tuneable between 3000-6000K when using the remote control supplied with each suspended light. The pendants and non-tuneable ceiling lights are available in three different colour finishes and diameters which increase in outstanding lumen output as they increase in size.
